

	RECOPRINT IMPRESIÓN'S POLICY ON THE CONSUMPTION OF FORESTRY MATERIAL AND COMMITMENT TO HEALTH, SAFETY AND LABOUR	Cod:	Política
		Rev:	0/sep-22
		Pag:	1 / 1

The chain of custody certification, under the requirements of the PEFC standard, is the tool chosen by RECOPRINT IMPRESIÓN to promote the conservation of forests and the maintenance and improvement of forest biodiversity and, at the same time, to guarantee our clients the origin of the raw materials we use.

RECOPRINT IMPRESIÓN is aware of the impact of its purchasing decisions on the forests it uses, of the need to promote responsible forest management among its suppliers and of the importance of workers' rights. For all these reasons, it is committed to avoiding any kind of relationship with activities such as:

- The exploitation of illegal timber, or the illegal marketing of timber or forestry products.
- The violation of human and traditional rights in forestry operations.
- Destruction of high conservation values by logging activities.
- Conversion of natural forests to plantations or non-forest uses.
- The introduction of genetically modified organisms into forestry operations.
- Violation of any of the ILO Core Conventions as defined in its 1998 Declaration on Fundamental Principles and Rights at Work.

RECOPRINT IMPRESIÓN also undertakes to comply with the social and health and safety commitments established in the legislation in force, such as:

- To allow workers to associate freely, to elect representatives and to participate in collective bargaining.
- Respecting the minimum legal age for hiring, not employing workers under 18 years of age.
- Comply with the legal requirements for health and safety at work, as well as not using forced labour.
- Respect the conditions of equal opportunities and equal treatment of workers.

For all these reasons, the management is committed to ensuring that this policy is understood and implemented at all levels of the company and that it is available to all our customers and stakeholders who request it.

The Management of RECOPRINT IMPRESIÓN
